

WANIA ZANIB

Machine Learning / AI Engineer

zanibwania@gmail.com | +92 333 6680445 | linkedin.com/in/wania-zanib | github.com/waniazanib | Faisalabad, Pakistan

SUMMARY

Third-year B.S. Artificial Intelligence student with internship experience building end-to-end ML pipelines, NLP classifiers, and data preprocessing workflows. Skilled in model evaluation, feature engineering, and hyperparameter tuning to deliver accurate, production-ready Python solutions.

TECHNICAL SKILLS

Languages: Python, SQL, C++, HTML/CSS

Machine Learning / Deep Learning: PyTorch, ONNX Runtime, ResNet, CNN, GradCAM, Transformers, NLP, Text Classification, Model Evaluation, LLM API Integration, Prompt Engineering, TensorFlow/Keras, Scikit-learn

Data: Pandas, Numpy, Feature Engineering, Data Preprocessing, JSON

Databases: MySQL, SQLite, Supabase, Firebase

Tools & Platforms: Git, GitHub, REST APIs, LangChain, Hugging Face Hub, Kaggle, Gradio, Streamlit

PROJECTS

VoiceGuard — Acoustic Deepfake Detection Engine | [GitHub Repo](#)

DEC 2025

Python, PyTorch, ONNX, CNN, Model Evaluation

- Resolved a 9:1 class imbalance across 25,380 audio samples via metadata analysis, improving model accuracy by 18%.
- Optimized deep learning inference pipeline by 6.7× through profiling and refactoring for production-level throughput.
- Validated predictions across 71,237 evaluation samples with systematic data-quality checks before each release.

MoodFit | [GitHub Repo](#)

MAY 2026

Python, Machine Learning, Supervised Learning

- Developed an ML-powered mood-fitness recommendation system with feature encoding and normalization pipeline.
- Fine-tuned a RoBERTa transformer on 56,000+ text samples achieving 91.4% accuracy and 0.89 macro F1-score across 7 emotional profiles for real-time semantic classification.

Fake Job Detector | [GitHub Repo](#)

JUN 2026

Python, NLP, Scikit-Learn, Text Classification

- Sourced real-world job postings from Kaggle; applied text cleaning and TF-IDF vectorization for binary classification training.
- Evaluated multiple ML models using precision, recall, and F1-score; selected best-fit algorithm through benchmark comparison.

EXPERIENCE

AI Engineering Intern — Genztechs, Faisalabad

JUN 2025 – AUG 2025

- Designed and trained Python-based ML models; improved classification accuracy through systematic feature engineering, hyperparameter tuning, and end-to-end data pipeline development
- Automated data preprocessing and model evaluation workflows, reducing manual effort across training cycles by integrating structured Python pipelines for feature extraction and performance benchmarking.

EDUCATION

B.S. Artificial Intelligence — National Textile University, Faisalabad

Expected: June 2027

GPA: 3.72 / 4.00

Relevant Coursework: Machine Learning, Deep Learning, NLP, Data Structures & Algorithms, Linear Algebra, Statistics, OOP
